

# Milk Carton Bird Feeder Craft

Hang this bird feeder on a tree or fence and spot what species are in your backyard!

Have an adult help you cut your milk carton!

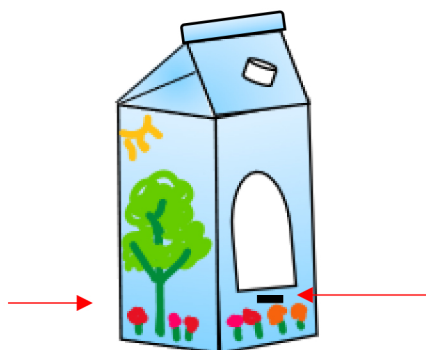

1. Cut two openings on the sides of the milk carton

2. Paint and decorate your bird feeder

3. Cut two slits underneath the openings to insert a long stick for the birds to sit on

4. Punch a hole through the top to hang your bird feeder, fill with seeds, and wait for the birds!
